I am a Computer Applications student with a strong interest in web development and programming. I have built small projects using HTML and CSS, which helped me understand the basics of creating user-friendly web pages. Along with this, I have hands-on experience in UiPath RPA and Excel automation, which strengthened my problem-solving skills. I am eager to keep learning new technologies and build a successful career as a web developer in the IT field.

Experience

Internships

2026

- Skywin Academy

I worked on a UiPath RPA project where I automated the process of transferring data from Excel to a web form. The project involved reading data from Excel, filling out the form automatically, and testing the workflow to make sure everything runs smoothly.

Projects

2026

- Supplier Record Creation Automation Workflow

The primary objective of this project is to design and develop an automation workflow using UiPath Studio to eliminate manual data entry tasks by transferring data automatically from an Excel file into a web-based form. Skills used - UiPath Studio, Robotic Process Automation, Excel Automation using DataTables

Education

Class XII

2024

Tamil Nadu with 69%

Class X

2022

Tamil Nadu with 74%

Graduation

2027

- BCA - Bachelor of Computer Applications
- Jamal Mohamed College, Tiruchirapalli
- Web Development
